

Financial Performance Dashboard Report

1. Project Title

Financial Performance Dashboard using Power BI

2. Objective

The objective of this project is to develop an interactive Power BI dashboard that enables business stakeholders to monitor sales performance, profitability, product performance, and regional sales trends. The dashboard provides key business insights through KPIs, interactive filters, and visualizations to support data-driven decision-making.

3. Dataset

Dataset Name: Microsoft Financial Sample Dataset

Tool Used: Microsoft Power BI Desktop

Dataset Attributes:

- Segment
- Country
- Product
- Discount Band
- Units Sold
- Manufacturing Price
- Sale Price
- Gross Sales
- Discounts
- Sales
- COGS
- Profit
- Date
- Month Number
- Month Name
- Year

4. Data Preparation

The following preprocessing steps were performed before creating the dashboard:

- Imported Excel dataset into Power BI.
- Verified and corrected data types.
- Renamed columns where necessary.
- Checked for missing or inconsistent values.
- Prepared the dataset for analysis using Power Query.

5. Key Performance Indicators (KPIs)

The dashboard includes the following KPIs:

- Total Sales
- Total Profit
- Total Gross Sales
- Total Units Sold
- Profit Margin (%)

These KPIs provide a quick overview of business performance.

6. Dashboard Components

The dashboard consists of the following visualizations:

- KPI Cards
- Sales Trend by Year
- Profit Trend by Year
- Sales by Country
- Sales by Segment
- Sales by Discount Band

Interactive slicers include:

- Year
- Country
- Segment
- Product

These slicers allow users to dynamically filter the dashboard.

7. Business Insights

Key findings from the dashboard include:

- Total Sales reached **\$118.73M**.
- Total Profit was **\$16.89M**.
- The overall Profit Margin was **14.23%**.
- The **United States** generated the highest sales among all countries.
- The **Government** segment contributed the highest share of sales.
- The **Medium Discount Band** generated the highest revenue.
- Sales and Profit increased significantly from 2013 to 2014, indicating positive business growth.

8. Dashboard Features

- Interactive slicers for dynamic filtering
- KPI cards for performance monitoring
- Time-series analysis of Sales and Profit
- Country-wise sales comparison
- Segment-wise revenue distribution
- Discount band analysis
- Professional dashboard layout with consistent color theme

9. Tools & Technologies

- Microsoft Power BI Desktop
- Microsoft Excel
- Power Query
- DAX (Data Analysis Expressions)

10. Conclusion

The Financial Performance Dashboard successfully transforms raw financial data into meaningful business insights. By integrating KPIs, interactive filters, and analytical visualizations, the dashboard enables stakeholders to monitor performance efficiently and make informed business decisions.
